ADMIN FEATURES SUMMARY

1. ADMIN LOGIN SYSTEM

- Admin signs in using email + password.
- Role-based authentication ensures only admins can access admin dashboards.
- JWT tokens include admin role for secure route access.

2. ADMIN DASHBOARD — USER WORK QUEUE

Admin sees list of:

- Users who have uploaded documents
- Users with pending verification
- Users whose reviews are incomplete

Dashboard shows:

- User Name
- Email
- Phone
- Upload progress bar
- Current verification status

3. ADMIN DOCUMENT REVIEW SYSTEM

When admin selects a user:

- Full document upload progress is displayed.
- Each uploaded document includes:
 - Review button
 - Approve button
 - Reject button

Document Status Options:

- Pending Review
- Approved
- Rejected
- Missing

4. EMAIL NOTIFICATION SYSTEM

If Admin Rejects a Document:

- User receives email notification
- Email includes rejected document name and optional remarks
- User can re-upload corrected document

If All Documents Are Approved:

- User receives “Verification Complete” email
- User status updates to Fully Verified

5. ADMIN BACKEND SERVICES

Backend stores:

- Document status (Pending, Approved, Rejected)

- Review notes (optional)
- File ID & timestamp
- User verification overall status

Admin APIs include:

- Fetch users needing review
- Fetch documents per user
- Approve a document
- Reject a document
- Trigger automatic emails
- Update verification completion

6. ADMIN FRONTEND INTERFACE

Includes:

- Admin Login Page
- Admin Dashboard showing user verification queue
- Document Review Page with:
 - File previews/links
 - Approve / Reject controls
 - Status indicators
